CURRENT ACTIVITIES

	Activities	**Area**	**Brief Details:** **1. Objectives** **2. Progress to date**	**Challenges/Problems Faced:** **1. Lack of resources** **2. Lack of know-how** **3. Others (e.g. up-skilling)**	**Solutions Implemented/Type of assistance requirement from ABU**
1.	**Development projects/Upgrading facilities/Training**	Media IP infrastructure project	• Upgrade the existing baseband central infrastructure by adopting the latest IP technology for media production workflows. • Progressively migrate towards fully IP-based media production workflows while maximising the use of existing equipment through a phased hybrid implementation.	• Limited internal resources and IP-media expertise. • Need to upskill technical and operational teams to support the transition. • Legacy equipment and workflows require a phased hybrid implementation before full IP migration.	• Knowledge sharing and guidance on industry best practices for designing and operating IP-based media production infrastructure. • Sharing of case studies and lessons learned from broadcasters that have migrated from baseband/SDI to hybrid and full-IP environments, particularly approaches for integrating legacy systems during transition.
2.	**Participation in ABU Activities**	**Area**	**Level of Participation**	**Reasons for not participating (though interested)**
